

2018 Midnight Moonlight Maritime Marathon

Question received by the race committee from #18353, on 7/21/18 at 0904:
Is “Bluff Point Channel Marker” the same thing as “Raccoon Strait light 5”?

Answer (posted 7/21/18 at 1015):

All navigation information included in the race documents uses data from government issued NOAA charts. “Bluff Point channel marker” in the SIs means the channel marker on Bluff Point. NOAA charts label this channel marker as: Fl G 4s 20ft 4M”5” as included in the sailing instructions.

Phone apps and electronic charts may have their own differing names. Please refer to NOAA charts for all navigation information. The provided graphic appears to be the same point, but refer to a government issued NOAA chart for confirmation.
